I am writing to say that I oppose NAB's petition 04-160 and support XM and the service of providing Instant Traffic & Weather. There is a reason why the public is choosing to pay for XM radio. The reason is because of the garbage that is filling the public air ways. This is a ridiculous proposal by the NAB, may be they should use thier resources to help to improve the quality of free radio instead of attempting to tell me a paying customer what services I deserve to have.

If this proposal is allowed to take affect this will truly prove who is incharge and that our regulating bodies are the window dressing of corporate lobbyist.
